Weekly Report

ICT Department

Due Date: 23 June 2023

Tasks

➢ Victor Kanye local municipality Website Development: Responsible for the creation and ongoing maintenance of the Department page using WordPress.
➢ Developing a monthly report function that will can be used by the head of department for uploading monthly reports and admin downloading the monthly reports.
➢ An API lesson session: learning experience about Application Programming Interfaces (APIs). The session covered API basics, including endpoints, requests, responses, authentication, and data formats.

Recommendations

The focus will be on further improving the Victor Kanye local municipality website's design and forek projects.

Conclusion

In conclusion, the month of June was productive, with significant progress made in the development and maintenance of the Victor Kanye local municipality website. The implementation of the monthly report functionality and participation in the API lesson session added value and contributed to my professional growth. I look forward to continuing the positive momentum in the coming month and delivering further enhancements to forek projects.
